EDUCATION

- 2017 - 2019
UNIVERSITY OF COPENHAGEN
 - MSc Bioinformatics
- 2012 - 2016
UNIVERSITÄT DES SAARLANDES
 - BSc Bioinformatics

SKILLS

- Python, R, Unix/Bash, SQL
- ML (PyTorch, Keras, scikit-learn)
- Large-scale Data Management
- Bioinformatics & HPC
- Sensitive Health Data Handling
- Data Visualization & Analysis
- Research Support & Collaboration
- Teaching & Knowledge Transfer
- Problem Solving
- Cross-cultural Teamwork

LANGUAGES

- English - Full professional
- German - Full professional
- French - Professional working
- Luxembourgish - Native proficiency
- Swedish - Elementary proficiency

WORK EXPERIENCE

- Software Developer**
Karolinska Institutet, Stockholm

 - Harmonized data within network of databases for epidemiological research and maintenance of local health-record databases, coded in R and Python
 - Maintained website and web-forms about healthy-aging research
 - Supported researchers in coding, data storage and data privacy matters

2022 - 2024
2 YEARS

- Research and Development Specialist**
Luxembourg Centre for Systems Biomedicine

 - Worked on data management, data curation and platform building, among others in the european BIOMAP and the luxembourgish CON-VINCE projects.
 - Coded ETL pipelines using Python and bash on LCSB's servers, including cron jobs for automation of timed actions.
 - Created and conducted lectures for the "Programming with R and Python" course for "Master of Data Science" students.

2020 - 2022
2 YEARS

- Open Source Contributor**
BioLib

 - Created apps for the BioLib webplatform (<https://biolib.com>), by compiling C-projects to WASM. Did front-end development for the Open-Protein Webpage

2022
2 MONTHS
